From Real Estate to Quantitative Trading Excellence

What started as private models for friends is now powering institutional portfolios

2018–2021

Co-founder Luc Lising built his career in real estate investments, rising to executive level at a property investment firm.

2021–2022

Introduced to proprietary trading. Intrigued by algorithmic models, Luc began testing and refining systematic strategies.

2022–2023

Released trading models privately to friends & family. No plans to sell — until early adopters' success created strong demand.

Futures

Nasdaq, SP500, Dow Jones,
Gold, Crude Oil

WIN RATE: 67–83%

Dynamic SL based on volume

Crypto

BTC, ETH, SOL, DOT

WIN RATE: Up to 82%

Default 1:1 (2%/2%)

Core Trading Philosophy

Hybrid Logic

Trend-following + mean-reversion strategies for broad market adaptability across various conditions

Asset-Specific Calibration

Every model precisely tuned for the volatility, liquidity, and unique price patterns of its target market

Quality Over Quantity

Only executing high-conviction setups, deliberately avoiding overtrading to preserve capital

Full Automation

Systematic execution removes emotional decision-making from the trading process

Risk First

Built-in SL/TP controls, multi-timeframe confirmation, and strict position sizing protocols

Futures

Trades ONCE per day, no overnight holds risking huge drawdown. Shorts and longs through bear markets.

Key Technical Components

Extreme Trend Breakouts

Adaptive MAs, TTM Squeeze, multi-timeframe confirmation for high-probability trend entries

High-Volatility Trend Following

ADX, ATR, VWAP to capture strong directional moves in volatile market conditions

Low-Volatility Reversals

RSI, Bollinger Bands, volume & PSAR for precise entries in range-bound markets

Trend Convergence

Multiple MA alignments with Bollinger Band confirmation for high-probability trade signals

Channel Breakouts & Direction Tracking

Keltner + Bollinger channels and SuperTrend analysis for precise breakout trading

Risk Management & Customisation

1

Adaptive Risk Controls

Adjustable TP/SL & trailing stops tailored to market conditions

2

Fine-Tuning Capabilities

Sensitivity controls for trend strength thresholds

3

Component Flexibility

Indicator toggles per strategy for customized approach

4

Signal Confirmation

Multi-signal confirmation per bar for reduced false signals

5

Alert System

Email, SMS, in-app, or webhook for auto-execution

STOCK ALGORITHMS — EQUITIES SUITE

Algorithm	Ticker	Avg. Annual Return	Max Drawdown	Win Rate
Apple Algo	AAPL	**~31.5–32.5%**	~10–12%	~66%
Tesla Algo	TSLA	**~65.5–70.9%**	~11–12%	~79%
Nvidia Algo	NVDA	**~41.5–44.5%**	~10–12%	~72%

Combined average annual return: ~45–53% per year since 2022

Chart Timeframe	**1-Hour**
Strategy Type	**Trend + Mean Reversion**
Directions	**Long & Short**
Avg Trades	**8–10/mo combined**

Hold Time	**2–3 days (swing)**
Risk/Trade	**~1% of capital**
Leverage	**None — cash only**
Automation	**100% fully automated**

2022 BEAR MARKET — PROOF OF MARKET NEUTRALITY

When the market crashed, Vector's algorithms were shorting and generating profits.

THE MARKET IN 2022

S&P 500	−30%
NASDAQ	−40%
Apple (AAPL)	−35%
Tesla (TSLA)	−55%
Nvidia (NVDA)	−70%

VECTOR IN 2022

+35–50%

Combined stock algorithm returns

Apple algo returned +35–40%
in a year AAPL stock fell 35%

This is the clearest real-world demonstration of market neutrality.

Integration & Broker Compatibility

For Equities, Futures + Crypto

Futures and Equities

Interactive Brokers

Equities Only

Alpaca

Futures Only

NinjaTrader, Tradovate

Crypto Only

Coinbase

IRA Compatible: Trade futures through NinjaTrader IRA accounts (Traditional, Roth & Rollover) — no additional fees

TAX ADVANTAGES & IRA Trading

60/40 TAX RULE — SECTION 1256

60% taxed at long-term capital gains rates

40% taxed at short-term capital gains rates

Applies regardless of holding period — even intraday trades qualify. For top-bracket earners, this can reduce effective tax rate by ~10%. Simplified reporting via Form 6781. Special 3-year loss carryback election also available.

TRADE FUTURES IN YOUR IRA

NinjaTrader offers IRA accounts (Traditional, Roth & Rollover) with no additional fees. Trade Vector's futures algo directly through a tax-advantaged retirement account. Your capital stays in your name at a U.S. regulated brokerage — full control, full protection.

THE VECTOR DIFFERENCE

Zero Leverage

Returns from edge, not amplified risk. No margin calls or liquidations.

Defined Risk

Every trade has a stop-loss. Max drawdowns engineered into the system.

U.S. Regulated

Capital stays in your name at FDIC/SIPC insured brokerages.

Full Transparency

We publish losses alongside wins. No black boxes — real technical setups.

100% Automated

Entry, exit, stop loss, profit target — all handled by the algorithm.

60/40 Tax Treatment

Futures qualify for Section 1256 — significant tax savings for traders.

12 Month Satisfaction Guarantee

If this is not what you're looking for after 12 months of using the algorithm, we will refund your licensing fee minus the profits you made.

- We trade our own capital with the same algorithms
- Powering the Sofex EU Hedge Fund
- 5+ year live track record across market conditions
